Ideation Phase
Define the Problem Statements

Date	31 January 2025
Team ID	
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe customer with 3-4 key characteristics - *who are they?*	Describe the customer and their attributes here
I'm trying to	*List their outcome or "job" the care about - what are they trying to achieve?*	List the thing they are trying to achieve here
but	Describe what problems or barriers stand in the way – *what bothers them most?*	Describe the problems or barriers that get in the way here
because	Enter the "root cause" of why the problem or barrier exists – *what needs to be solved?*	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions from the customer's point of view – *how does it impact them emotionally?*	Describe the emotions the result from experiencing the problems or barriers

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel

PS-1	ServiceNow fulfiller / service desk agent	manage incidents quickly with correct, complete data	the Incident form shows every field to everyone and mandatory data is often missed	there is no Client Script or UI Policy to make fields dynamic, mandatory or read-only based on the context	frustrated and slowed down by rework
PS-2	Incident caller / end user	raise an incident without confusion	the form is cluttered, the category and priority are wrongly filled, and tickets get routed to the wrong team	field behaviour is not controlled on the form (show/hide, mandatory, validation and alerts)	confused and worried my issue will be delayed
